

## FULL COUNCIL - 29<sup>th</sup> MARCH 2021

### CLIMATE EMERGENCY

#### SUPPORT OF THE CLIMATE AND ECOLOGICAL EMERGENCY BILL

The Climate and Ecological Emergency Bill is progressing through its early stages in Parliament. Due to our declaration of a Climate Emergency, this Council has been asked to consider stating its formal support of the Bill to our local MP, requesting that he supports it, and inform the CEE Bill Alliance of 100+ MPs and 77+ organisations of our support.

The full Bill can be found here: <https://publications.parliament.uk/pa/bills/cbill/58-01/0172/200172.pdf>

A summary and information from the CEE Bill Alliance can be found here: <https://www.ceebill.uk>

Humans have already caused irreversible climate change, the impacts of which are being felt in the UK and around the world. Global temperatures have increased by 1 degree Celsius from pre-industrial levels. Atmospheric CO<sub>2</sub> levels are above 400 parts per million (ppm) and continue to rise. This far exceeds the 350 ppm deemed to be a safe level for humanity.

Without more significant and sustained action, the world is set to exceed the Paris Agreement's 1.5°C limit between 2030 and 2040. Therefore, the current UK target of net zero by 2050 is not satisfactory. It is too little too late.

The increase in harm caused by a rise of 2°C rather than 1.5°C is significant. This is described by the Intergovernmental Panel on Climate Change's Special Report on Global Warming of 1.5°C published in October 2018. According to the IPCC, limiting heating to 1.5°C may still be possible with ambitious action from national and sub-national authorities, civil society, the private sector and local communities. The costs of failing to address this crisis will far outstrip the investments required to prevent it.

Investing now will bring many benefits in the form of good jobs, breathable towns and cities and thriving communities.

Ivybridge Town Council has declared a climate and ecological emergency.

The Bill before Parliament—the Climate and Ecological Emergency Bill (published as the “Climate and Ecology Bill”)—according to which the Government must develop an emergency strategy that:

- requires that the UK plays its fair and proper role in reducing greenhouse gas emissions consistent with limiting global temperature increase to 1.5 degrees C above pre-industrial temperatures;
- ensures that all the UK's consumption emissions are accounted for;
- includes emissions from aviation and shipping;
- protects and restores biodiverse habitats along overseas supply chains;
- restores and regenerates the UK's depleted soils, wildlife habitats and species populations to healthy and robust states, maximising their capacity to absorb CO<sub>2</sub> and their resistance to climate heating;

- sets up an independent Citizens' Assembly, representative of the UK's population, to engage with Parliament and Government and help develop the emergency strategy.

It is **recommended** that this Council therefore resolves to:

- Support the Climate and Ecological Emergency Bill
- Inform the local media of this decision;
- Write to local MP, asking him to support or thanking him for supporting the Bill;  
and
- Write to the CEE Bill Alliance, the organisers of the campaign for the Bill, expressing its support.

Jonathan Parsons  
Town Clerk
